

## Nylonstrainers

Art. No. 109030-80

**Nylonstrainers Ø32 and Ø45**

All conical nylon strainers are fitted with an "opening string" to quickly "refresh" the strainer.

Simply pull the string and the clogged strainer refreshes to empty the content.

Nylon strainers in custom sizes such as xxx-long or with a larger diameter are available on request.

It is also possible to purchase straining cloth in bulk portions.

Stands made in exquisite hardwood fitted with stainless steel bands and screws, for the strainers are also available.

Very popular, flexible and economic solution.

The strainers come in three different meshes (200, 350 and 1000 micron) and two different diameters (32 cm and 45 cm).
